

S-WINGS

BIOMIMETIC FINS

GUETHARY

PRO440

Green

For excellent surfers who are looking for propulsion and short radius pocket surfing. It's the New School model.

PRO440 Green are designed for high performance surfing with an excellent propulsion in small wave or wavepools to do bigger airs.

Orange

PRO440 Orange is for excellent surfers and competitors with heavy foot, to have more lively propulsion with less effort keeping energy during each short radius turns.

PRO440 are designed for high performance surfing in medium waves, Vector Carbon brings up stronger flex / stiffness to have more propulsion with the S-wings coil effect when the surfer release his feet pressure. It's our most new school model.

Red

For excellent power surfers in strong waves to have great control and keep the line in the tube or the slabs. The Pro440 Red Carbon are designed to help the hell men in powerful waves to keep easily the right line in heavy water and to control the foam ball deep in the tube.

Quad set up with the RQ375.

4.4" trailing arm.

Green < 170 lbs.

Orange 150 - 190 lbs.

Red > 190 kgs.

SW500

Green

The SW500 Green are designed for radical surfing and high propulsion. The short appendage allows tight radius turns. It fits Summer, Performance, Quad boards (with small 3,5" back fins) in small and clean waves for maximum propulsion !

Orange

The SW500 Orange are designed for medium to heavy foot surfers for their Summer, Performance, Quad (with small 3,5" back fin), Semi-gun, Gun and Sup boards in solid waves and/or stormy sea conditions for maximum control and propulsion. It's our most polyvalent model out of our range of fins.

Red

SW500 Red Carbon is for Power Surfing in strong and hollow waves. Unidirectionnal carbon fibers give more liveliness to the fin and immediate propulsion. They excel in keeping the high line in the barrel, they bring up control and security in the carves.

Trifin or Quad set up with rearquads around 3.5".

5.00" trailing arm.

Green < 150 lbs.
Orange 130 - 180 lbs.
Red > 150 lbs.

SW540

Orange

The SW540 Orange fins are very versatile, with great propulsion and drive for maximum carving.

Can be used also as Twin fins.

They are designed for medium footed surfer with their Summer, Semi-gun and Sup boards in medium to solid waves.

Red

The SW540 Red Carbon is for power surfing in strong and hollow waves.

Unidirectional carbon fibers give more liveliness to the fin and immediate propulsion.

They excel in point-break wave and down the line surfing, in the carves.

Trifin or Quad set up with rearquads around 3.5".

5.40" trailing arm.

Orange 120 - 160 lbs.
Red >150 lbs.

RQ375

RQ375 is a 3.75" Rear quad or lateral for 2+1 longboard / Egg set up.

Medium flex for every kind of waves and average weight surfers.

Use them with the PRO440 or SW500.

TWIN520

Green

Twin fin model designed with flexible resin to have maximum flexibility to create maximum propulsion with the S-wings spring effect.
Very good for surfers less than 80 Kgs / 160Lbs in small waves conditions . The speed gain is great when the waves are powerless.

Red Carbon

Twin fin model with carbon fibers in the axis of the trailing arm to have a stiffer spring effect.
Designed for surfers over 150Lbs in clean all around and powerful conditions. Could be surfed with a small central knobster to keep the line during rail to rail actions.

Purple G10

Twin fin model in high-end G10 Epoxy.
Designed for surfers over 85 Kgs / 170Lbs. In average waves conditions or chargers looking for barrels.

Mini trailer fin coming soon...

KEEL480

This long awaited model is designed for the RetroFish with more surface than the Twin520 to have great control and drive with the S-wings propulsion in small waves thanks to the 4.80" trailing arm.

The fin boxes must be installed more than 9" from the rear unless you'll too much drive. Only one flex is available but for heavier surfers, please contact us as we have stiffer versions at the workshop.

Available only as single tab.

For surfers between 150 and 190 lbs.

USBOX

5SW700

To be installed with 2 side bites on your 9' Performer Longboard and on your Egg, Sup and Duo.

Long appendage with large paddle / spatula brings a lot of propulsion and control improvement of the stability when the surfer puts his weight up front, even in turbulent waters.

Perfect to improve your nose-riding and practice hang-tens !

6SW600 VOLAN

For Eggs, Performance Longboards, Duos or Bonzers, with 2+1 side bites.

Flexible model for lightweight surfers in small waves.

The 6" appendage with small paddle/spatula brings good propulsion, control and tight radius turns ability.

6SW600 G10

High performance fin for Guns, Semi-guns, Eggs, Performance Longboards or Performance Singles with channels. For heavy footed surfers in powerful waves.

Very good trajectory control with propulsion / S-wings spring effect and tight radius turns ability.

The 6" appendage and the small paddle spatula brings up the stability for the surfers already able to nose-ride.

rider : Bruno Compagnet

DINOFIN 7SW550

VOLAN

For small singles and light retro longboards, we recommend this flexible model for lightweight surfers in small waves.

Good propulsion and better stability than a bigger classic fin .
Decorated with an original drawing from french surfer, artist and designer François Lartigau.

G10

For Gliders and Classic Retro Longboards, Singles. Stiffer than the Volan / Polyester model, it brings more propulsion/ S-wings spring effect thanks to the high-end Epoxy G10.

For heavy boards pivot maniability and great stability for nose-rides .

Justine Mauvin's favorite one.

BONZER

This Volan fin dedicated to Bonzer is 5.5" tall with 5.25" trailing arm.

We reduce the sizes to compensate the Bonzer sidefin surfaces. This fin works very well with classic thruster side fins. The small fish tail gives a sensitive propulsion and better control. Very good to give a drivey board a more lively feeling without sacrificing the pivot ability.

#morepowerlesseffort #bonzer4ever

For surfers between 140 and 170 lbs.

C430 STEP

When you want to ride lateral S-wings SW500 and SW540 but you have a USbox for central fin.

Most of the time boxes are installed up in front cause of their thickness.

The Step on the tab allows this small USbox 4,3" center fin to be positioned all the way further back of the box .

SW500 XXL Purple G10

This model is for guns with a quad setup, to surf XXL waves. Ultra stiff because of the G10 material.
Make the drop easily and hold a good line on heavy conditions with this fin.

5.00" trailing arm.

Sold separately from the Rear Quad G10.

Rear Quad G10

BW440

XXL gun fins made out of G10. Ultra stiff with a bit smaller trailing arm than SW500 above.

4.40" Trailing arm.

2 fins kit.

#RIDE DIFFERENT

Inspired by nature, developed and tested by surfers, S-wings fins mark a true revolution in surfing equipment and practice !

The original design of S-wings fins improves speed, control and recovery further than a classic fin. A complete range of sets was developed to adapt to all waves conditions and all surfing styles. Go on a trip, change your fins, not your board !
